Class Information

Class: WBT Virtual 03 (Virtual - 03.43) - AWR-346 Intro to Rad/Nuc WMD Operations for Law Enforcement, Dec 6, 2023, starts at 1200 hrs EST

Class Description: This is an Instructor mediated online course delivery. The training will be delivered by an Instructor using the WebEx platform and the exams will be online through the CTOS Learning Management System (LMS). Course date is Dec 6, 2023 and class will start at 1200 hours EST. The length of this course is 3 hours. WebEx log in details will be available upon completion of registration requirements. The course provides Law Enforcement with fundamental knowledge in two distinct mission spaces related to radiological/nuclear threats to Preventive Radiological/Nuclear Detection (PRND) mission and the response mission. PRND mission training covers program structure, operational modes, and federal assets. Response mission training provides an overview of threat or incident recognition, protective measures, notifications, and scene site management during a radiological/nuclear WMD incident.

Instructor: CTOS Registrar
