Class Information

Class: WBT Virtual 04 (Virtual 04.30) - PER-345 Radiation Instruments Operations, May 31, 2023, begins at 1200 hrs EST

Class Description: This is an Instructor mediated on-line course delivery. The training will be delivered by an instructor using the HSIN (Adobe Connect) platform and the exams will be on-line through the CTOS Learning Management System (LMS). Course date is May 31, 2023 and class will start at 1200 hrs EST. The length of this course is 3 hours. HSIN (Adobe Connect) log in details will be available upon completion of registration requirements. The primary focus of PER-345, Radiation Instruments Operations, is to train First Responders the skills they need to select and operate radiation detection instruments in a radiological or nuclear incident environment. This course serves a dual role for the response community. For the new Operator, the course provides an overview of the general selection and operation of radiation detection equipment. For the experienced Operator, the course provides a refresher on multiple radiation detection platforms.

Instructor: CTOS Registrar
